Advanced Poly-Packaging Readies for Las Vegas What happens in Vegas ... will save you money all year!

(Akron, OH) October 4, 2007 – Advanced Poly-Packaging, Inc. made final preparations for PackExpo Las Vegas. The company will display and demonstrate various machines at Booth C-3027.

Tabletop baggers that will be on display include the T-275, T-300 and T-375. Each of the tabletop baggers offers features that appeal to a wide range packaging professionals and countless applications. The T-375, for example, is most recognized for the patented “Next Bag Out” printing capabilities. The machine prints directly onto the surface of the bag that next in line to be filled.

“A lot of people are surprised at first when they describe an application and we recommend one of our tabletop baggers,” said National Sales Manager Dan Moutz. “These baggers offer a lot more speed and a lot more versatility than most people think.”

Advanced Poly-Packaging’s tabletop bagging machines can bag up to 70 bags per minute.

Moutz said he always enjoys demonstrating the T-1000 Advanced Poly-Bagger™. It will be displayed at PackExpo Las Vegas with the LC-10 Light Safety Curtain and the Ti-1000 Thermal Transfer Printer. Moutz said the set up will illustrate how the T-1000 can be used alone or as the central part of a customized packaging system.

“Products are dropped from the UC-2400 Vibratory Parts Counter into bags on the T-1000,” said Moutz. “The bags is automatically sealed and conveyed to the US-4000 Rotary Check-Weigh Scale to determine if the package meets pre-determined weight standards or proper counts. If accepted, the package is taken on the UF-2000 Incline Conveyor for final packaging.”

NEWS RELEASE

Advanced Poly-Packaging, Inc.

Another model of the T-1000 will be available for visitors to see – the T-1000M (Medical). Moutz said the medical version is a breakthrough because it has a 3/8” seal bar and is approved for clean room use. The T-1000M also offers the convenience of being used with Advanced Poly-Packaging’s patented preopened Tyvek® bags on rolls.

In addition, visitors can receive information about the just-released Hands Free Towel Inspection and Packaging System, which is able to package up to 4,800 towels per hour with a flexible and ergonomically-considerate design.

Moutz said plenty of staff members will be on hand to answer questions, demonstrate equipment and offer one-on-one discussions to help people understand the various packaging solutions that Advanced Poly-Packaging, Inc. can offer.

Again, Advanced Poly-Packaging, Inc. will display products at Booth #C-3027.

About Advanced Poly

Advanced Poly-Packaging, Inc., a leader in the manufacturing of packaging machinery and poly bags, offers a complete line of bagging and auxiliary equipment that includes tabletop baggers, production bagging machines and fully automated custom bagging systems for a wide range of packaging solutions in the medical, pharmaceutical, hobby/craft, jewelry, fastener, tool and other industries. In operation since 1979, the company’s capabilities include film extrusion, flexographic printing, graphic design and poly bag conversion to produce custom high-quality poly bags. The company produces custom bagging solutions offering its engineering, custom programming and technical service capabilities to customers. Advanced Poly-Packaging is headquartered in Akron, OH and coordinates European sales and distribution from a satellite office in England.
