Advanced Poly-Packaging Releases Product List for EastPack Manufacturer will fill booth with machines for demonstration

(Akron, OH) May 10, 2007 – Advanced Poly-Packaging, Inc. released its plans for machine demonstrations its booth (#4539) at EastPack.

The company will display tabletop baggers including the T-275, T-300 and T-375. Each machine has unique components that bring more speed and automation than many people assume. The T-375, for example, features “Next Bag Out” printing capabilities to print directly onto the surface of the bag that’s next in line to be filled.

“While some applications require a customized packaging system, these tabletop baggers provide solid solutions for hundreds of applications,” said Stuart Baker, vice president of sales. “Some people don’t realize that customization is also an option on tabletops.”

Baker said the T-1000 Advanced Poly-Bagger™ will also be on display along with the Ti1000 Thermal Transfer Printer and the LC-10 Light Safety Curtain. In addition, Baker said he’ll show how the T-1000 integrates with other infeed equipment.

“Seeing is understanding,” said National Sales Manager Dan Moutz. “I look forward to showing people how the UC-2400 Vibratory Parts Counter drops products into bags on the T-1000. The bag is automatically sealed and conveyed to the US-4000 Rotary Check-Weigh Scale to determine if the package meets pre-determined weight standards or proper counts. If accepted, the package is taken on the UF-2000 Incline Conveyor for final packaging.”

Advanced Poly-Packaging, Inc.

The T-1000 is also available in wide, horizontal and medical models. The T-1000M (Medical) will be on display at the Javits Center. Complete with a 3/8" seal bar and approved for clean room use, this bagger offers the convenience of using patented Tyvek® bags on rolls.

"Our booth always has visitors because they know our machines are adaptable for their applications, rather than asking the customer to change what he wants," said Baker. "We are solutions-driven."

Baker said the company will have plenty of staff members on hand to demonstrate equipment, answer questions and offer one-on-one discussions about how Advanced Poly can help provide new packaging solutions.

Advanced-Poly Packaging, Inc. will display products at Booth # 4539.

About Advanced Poly

Advanced Poly-Packaging, Inc., a leader in the manufacturing of packaging machinery and poly bags, offers a complete line of bagging and auxiliary equipment that includes tabletop baggers, production bagging machines and fully automated custom bagging systems for a wide range of packaging solutions in the medical, pharmaceutical, hobby/craft, jewelry, fastener, tool and other industries. In operation since 1979, the company's capabilities include film extrusion, flexographic printing, graphic design and poly bag conversion to produce custom high-quality poly bags. The company produces custom bagging solutions offering its engineering, custom programming and technical service capabilities to customers. Advanced Poly-Packaging is headquartered in Akron, OH and coordinates European sales and distribution from a satellite office in England.
